Good morning, Anmol:

Your lab testing showed mildly elevated total cholesterol, low HDL ("good" cholesterol), and mildly elevated LDL ("bad cholesterol"). The rest of your cholesterol values are in the normal range. You do not need to be started on any cholesterol lowering medications at this time. I believe a trial of diet and exercise is sufficient for now. Lifestyle changes are essential to improve your cholesterol levels now and in the future. To bring your numbers down, try the following:

- Maintain a healthier weight. Lose extra pounds if only if overweight or obese. Losing even 5 to 10 pounds can help lower cholesterol levels.
- Eat a heart-healthy diet. Focus on plant-based foods, including fruits, vegetables and whole grains. You may schedule an appointment with a nutritionist through the TimelyCare application for free to help answer any additional nutrition questions and to help with meal planning.
- Limit saturated fats, found in red meat and full-fat dairy products, and trans fats, found in many processed foods. Monounsaturated fat - found in olive and canola oils - is a healthier option. Avocados, nuts and oily fish are other sources of healthy fat.
- Exercise regularly. Please start out slowly if you have never been very physically active before, work up to at least 30 minutes of moderate intensity exercise five times a week or vigorous exercise five times a week.
- Don't smoke. If you smoke, find a way to quit. Always drink alcohol in moderation.

We should recheck your fasting cholesterol level only at your next annual physical. Additional information regarding cholesterol can be found at the following website: https://my.clevelandclinic.org/health/articles/17100-cholesterol-what-you-need-to-know-about-high-blood-cholesterol

Your lab testing does show that you have vitamin D deficiency and borderline low vitamin B12. The only natural sources of vitamin B12 and vitamin D are animal products. If you are getting your vitamin B12 and vitamin D3 through supplements, please continue taking them. Some foods such cereals and some orange juices are fortified with vitamin D. Most breakfast cereals and soy milk are fortified with vitamin B12. Vitamin D and B12 deficiency can often be found in many individuals that are vegetarian or vegan.

Vitamin D is important to the body in many other ways as well. Muscles need it to move, for example, nerves need it to carry messages between the brain and every body part, and the immune system needs vitamin D to fight off invading bacteria and viruses. I only advise taking non-prescription Vitamin D3 5000 IU one capsule or tablet at least 3 times weekly (you can take it with or without food) indefinitely. Additional dietary sources of vitamin D and the importance of this vitamin can be found in the following website:

https://ods.od.nih.gov/pdf/factsheets/VitaminD-Consumer.pdf

I also recommend taking non-prescription vitamin B12 1000 mcg one tablet at least twice weekly going forward if you are not taking in adequate amounts through your regular diet. You do not need to recheck your vitamin D level and vitamin B12 level until your next annual physical.

The rest of your lab testing is in the normal range. You do not have any evidence of anemia and no evidence of diabetes. Your thyroid function is in the normal range.

Your eosinophil level is only mildly elevated; this can be found in individuals with history of allergies (such as pollen, cat, dog, or dust mite allergies). No treatment is indicated unless your allergies are problematic.

Your sexually transmitted illness (STI) testing is normal. Additional information about STI/STD can be found at:
https://www.mayoclinic.org/diseases-conditions/sexually-transmitted-diseases-stds/symptoms-causes/syc-20351240

I strongly recommend that you get your HPV vaccine series, and you are cleared to get this vaccine series only if interested. Your labs also show that you have immunity to MMR (measles, mumps, and rubella), hepatitis A virus, varicella (chickenpox), and the hepatitis B virus. I recommend that you update your Tdap vaccine mentioned during your physical exam and consider getting the HPV vaccine series only if interested by calling the UTD Health Center.

Tdap vaccine: https://www.cdc.gov/vaccines/hcp/vis/vis-statements/tdap.pdf

HPV vaccine: https://www.cdc.gov/vaccines/hcp/vis/vis-statements/hpv.pdf

Please let me know if you have any further questions. You may schedule an in-person appointment to discuss your lab results further.

I wish you all the best as you prepare to graduate from UTD!

Regards,

Biju Chacko, MPAS, PA-C

7600 - LIPID PANEL, STANDARD

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
CHOLESTEROL, TOTAL	208*	H	<200 mg/dL
HDL CHOLESTEROL	39*	L	> OR = 40 mg/dL
TRIGLYCERIDES	111		<150 mg/dL
LDL-CHOLESTEROL	146*	H	mg/dL (calc)

Reference range: <100

Desirable range <100 mg/dL for primary prevention;
<70 mg/dL for patients with CHD or diabetic patients
with > or = 2 CHD risk factors.

LDL-C is now calculated using the Martin-Hopkins
calculation, which is a validated novel method providing
better accuracy than the Friedewald equation in the
estimation of LDL-C.
Martin SS et al. JAMA. 2013;310(19): 2061-2068
(http://education.QuestDiagnostics.com/faq/FAQ164Opens a new window)

CHOL/HDLC RATIO	5.3*	H	<5.0 (calc)
NON HDL CHOLESTEROL	169*	H	<130 mg/dL (calc)

For patients with diabetes plus 1 major ASCVD risk
factor, treating to a non-HDL-C goal of <100 mg/dL
(LDL-C of <70 mg/dL) is considered a therapeutic
option.

10306 - HEPATITIS PANEL, ACUTE W/REFLEX TO CONFIRMATION

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
HEPATITIS A IGM	NON-REACTIVE		NON-REACTIVE

For additional information, please refer to
http://education.questdiagnostics.com/faq/FAQ202Opens a new window
(This link is being provided for informational/
educational purposes only.)

HEPATITIS B SURFACE ANTIGEN	NON-REACTIVE	NON-REACTIVE

For additional information, please refer to
http://education.questdiagnostics.com/faq/FAQ202Opens a new window
(This link is being provided for informational/
educational purposes only.)

HEPATITIS B CORE ANTIBODY (IGM)	NON-REACTIVE	NON-REACTIVE

For additional information, please refer to
http://education.questdiagnostics.com/faq/FAQ202Opens a new window
(This link is being provided for informational/
educational purposes only.)

HEPATITIS C ANTIBODY	NON-REACTIVE	NON-REACTIVE

HCV antibody was non-reactive. There is no laboratory
evidence of HCV infection.

In most cases, no further action is required. However,
if recent HCV exposure is suspected, a test for HCV RNA
(test code 35645) is suggested.

For additional information please refer to

(This link is being provided for informational/
educational purposes only.)

5259 - MEASLES, MUMPS, AND RUBELLA (MMR) AB (IGG) PANEL, IMMUNE STATUS

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
MEASLES AB (IGG), IMMUNE STATUS	>300.00		AU/mL

AU/mL	Interpretation
<13.50	Not consistent with immunity
13.50-16.49	Equivocal
>16.49	Consistent with immunity

The presence of measles IgG suggests immunization or past or current infection with measles virus.

For additional information, please refer to
http://education.QuestDiagnostics.com/faq/FAQ162Opens a new window
(This link is being provided for informational/ educational purposes only.)

MUMPS VIRUS AB (IGG), IMMUNE STATUS	76.50		AU/mL

AU/mL	Interpretation
<9.00	Not consistent with immunity
9.00-10.99	Equivocal
>10.99	Consistent with immunity

The presence of mumps IgG antibody suggests immunization or past or current infection with mumps virus.

RUBELLA AB (IGG), IMMUNE STATUS	18.70		Index

Index	Interpretation
<0.90	Not consistent with immunity
0.90-0.99	Equivocal
> or = 1.00	Consistent with immunity

The presence of rubella IgG antibody suggests immunization or past or current infection with rubella virus.

571 - IRON, TOTAL

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
IRON, TOTAL	183		50-195 mcg/dL

10231 - COMPREHENSIVE METABOLIC PANEL

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
GLUCOSE	78		65-99 mg/dL
Fasting reference interval			
UREA NITROGEN (BUN)	13		7-25 mg/dL
CREATININE	0.99		0.60-1.24 mg/dL

EGFR	106	> OR = 60 mL/min/1.73m2
BUN/CREATININE RATIO	SEE NOTE:	6-22 (calc)

Not Reported: BUN and Creatinine are within reference range.

SODIUM	139	135-146 mmol/L
POTASSIUM	4.3	3.5-5.3 mmol/L
CHLORIDE	101	98-110 mmol/L
CARBON DIOXIDE	28	20-32 mmol/L
CALCIUM	10.0	8.6-10.3 mg/dL
PROTEIN, TOTAL	7.9	6.1-8.1 g/dL
ALBUMIN	5.1	3.6-5.1 g/dL
GLOBULIN	2.8	1.9-3.7 g/dL (calc)
ALBUMIN/GLOBULIN RATIO	1.8	1.0-2.5 (calc)
BILIRUBIN, TOTAL	0.9	0.2-1.2 mg/dL
ALKALINE PHOSPHATASE	69	36-130 U/L
AST	23	10-40 U/L
ALT	26	9-46 U/L

6399 - CBC (INCLUDES DIFF/PLT)

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range

WHITE BLOOD CELL COUNT	6.9		3.8-10.8 Thousand/uL
RED BLOOD CELL COUNT	5.26		4.20-5.80 Million/uL
HEMOGLOBIN	15.7		13.2-17.1 g/dL
HEMATOCRIT	47.6		38.5-50.0 %
MCV	90.5		80.0-100.0 fL
MCH	29.8		27.0-33.0 pg
MCHC	33.0		32.0-36.0 g/dL

For adults, a slight decrease in the calculated MCHC value (in the range of 30 to 32 g/dL) is most likely not clinically significant; however, it should be interpreted with caution in correlation with other red cell parameters and the patient's clinical condition.

RDW	12.9		11.0-15.0 %
PLATELET COUNT	216		140-400 Thousand/uL
MPV	11.9		7.5-12.5 fL
ABSOLUTE NEUTROPHILS	3485		1500-7800 cells/uL
ABSOLUTE LYMPHOCYTES	2387		850-3900 cells/uL
ABSOLUTE MONOCYTES	462		200-950 cells/uL
ABSOLUTE EOSINOPHILS	524*	H	15-500 cells/uL
ABSOLUTE BASOPHILS	41		0-200 cells/uL
NEUTROPHILS	50.5		%
LYMPHOCYTES	34.6		%
MONOCYTES	6.7		%

EOSINOPHILS	7.6	%
BASOPHILS	0.6	%

508 - HEPATITIS A AB, TOTAL

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
HEPATITIS A AB, TOTAL	REACTIVE*	A	NON-REACTIVE

For additional information, please refer to
http://education.questdiagnostics.com/faq/FAQ202Opens a new window
(This link is being provided for informational/
educational purposes only.)

8475 - HEPATITIS B SURFACE AB IMMUNITY, QN

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
HEPATITIS B SURFACE AB IMMUNITY, QN	17		> OR = 10 mIU/mL

Patient has immunity to hepatitis B virus.

For additional information, please refer to
http://education.questdiagnostics.com/faq/FAQ105Opens a new window
(This link is being provided for informational/
educational purposes only).

4439 - VARICELLA ZOSTER VIRUS ANTIBODY (IGG)

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
VARICELLA ZOSTER VIRUS ANTIBODY (IGG)	8.61		S/CO

Signal to Cut-off

S/CO	Interpretation
<1.00	Negative - Antibody not detected
> or = 1.00	Positive - Antibody detected

A positive result indicates that the patient has antibody to VZV but does not differentiate between an active or past infection.
The clinical diagnosis must be interpreted in conjunction with the clinical signs and symptoms of the patient. This assay reliably measures immunity due to previous infection but may not be sensitive enough to detect antibodies induced by vaccination. Thus, a negative result in a vaccinated individual does not necessarily indicate susceptibility to VZV infection. A more sensitive test for vaccination-induced immunity is Varicella Zoster Virus Antibody Immunity Screen, ACIF.

457 - FERRITIN

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
FERRITIN	79		38-380 ng/mL

927 - VITAMIN B12

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
VITAMIN B12	370		200-1100 pg/mL

Please Note: Although the reference range for vitamin B12 is 200-1100 pg/mL, it has been reported that between 5 and 10% of patients with values between 200 and 400 pg/mL may experience neuropsychiatric and hematologic abnormalities due to occult B12 deficiency; less than 1% of patients with values above 400 pg/mL will have symptoms.

17306 - VITAMIN D,25-OH,TOTAL,IA

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
VITAMIN D,25-OH,TOTAL,IA	14*	L	30-100 ng/mL

Vitamin D Status 25-OH Vitamin D:

Deficiency: <20 ng/mL
Insufficiency: 20 - 29 ng/mL
Optimal: > or = 30 ng/mL

For 25-OH Vitamin D testing on patients on D2-supplementation and patients for whom quantitation of D2 and D3 fractions is required, the QuestAssureD(TM) 25-OH VIT D, (D2,D3), LC/MS/MS is recommended: order code 92888 (patients >2yrs).

See Note 1

Note 1

For additional information, please refer to
http://education.QuestDiagnostics.com/faq/FAQ199Opens a new window
(This link is being provided for informational/ educational purposes only.)

496 - HEMOGLOBIN A1c

Reported
4/2/2025 5:00 PM
Status
Final
Lab Name
Quest Diagnostics Irving

Test Name	Result	Flags	Reference Range
HEMOGLOBIN A1c	5.3		<5.7 % of total Hgb

For the purpose of screening for the presence of diabetes:

<5.7% Consistent with the absence of diabetes
5.7-6.4% Consistent with increased risk for diabetes (prediabetes)
> or =6.5% Consistent with diabetes

This assay result is consistent with a decreased risk of diabetes.

Currently, no consensus exists regarding use of hemoglobin A1c for diagnosis of diabetes in children.

According to American Diabetes Association (ADA) guidelines, hemoglobin A1c <7.0% represents optimal control in non-pregnant diabetic patients. Different metrics may apply to specific patient populations. Standards of Medical Care in Diabetes(ADA).
